

Security Awareness Training

Hacker For Hire

Education. Not Exploitation

Secure Yeti's Chief Adversarial Officer, **Jayson E. Street** will train your staff to harness their natural situational awareness to better protect themselves and their employer, online or in-person.

Cybersecurity Awareness Training Courses

IN-DEPTH EMPLOYEE CYBERSECURITY TRAINING SERVICES

Being a Teachable Moment Through Social Engineering Attacks & Direct Impact Education

This 2-day course offers pentesters and security teams a unique and effective learning experience through real-world threats and hands-on simulations.

Incident Response for Onsite Threats & Human Compromise

This 2-day course provides a human-centric approach to incident response, equipping participants with techniques for de-escalation, comprehensive social engineering incident guidance, and conflict resolution.

Personalized Internal Security Awareness Courses

Depending upon your needs, in 1-4 hours, this in-person course delivers security awareness training that emphasizes the dangers of social media, provides insights into the attacker's mindset, and equips participants with vital security tools.

"I don't have to bypass the firewall if I can bypass your receptionist."

- Jayson E. Street,
Hacker, Helper, &
Human.

Achieving Security Awareness Through Social Engineering Attacks

In just 2 days, this course empowers participants with a "Think Like an Attacker" approach, enabling them to mitigate threats proactively.

Workforce Security Assessment

This workforce security assessment, tailored to your specific environment, offers an eye-opening intrusion simulation, empowering everyone with practical skills and knowledge to uncover hidden vulnerabilities and instill a security-minded culture in your team.

Achieving Security Awareness Through Social Engineering Attacks

Over the course of 2 days, your workforce will be trained on and receive a customized Hak5 Field Kit, current red team and security awareness strategies, and comprehensive approaches for forming your own effective internal awareness program(s).

Adversarial Simulation Attacks & Direct Impact Education Training

Over the course of 2 days, pentesters, red teamers, and internal security teams will participate in a hands-on, effective learning experience offering real-world preparedness. As an added bonus, they will receive a customized Simulated Adversary Hak5 Field Kit and the Ducky Script Coding Book.

Turn your security vulnerabilities into opportunities for growth.
